

What is Pre-Registration?

Pre-Registration in MyChart allows you to register online 1 week before your appointment. When you click on “e-preregistration” button next to your upcoming appointment, you can update your medications, allergies, health issues, and emergency contacts. If there are any questionnaires linked to your upcoming appointment, you can complete those questionnaires as you are completing your pre-registration.

Pre-registering for your appointment online will make it faster for you to check-in when you come to the clinic. Providing your up-to-date information during pre-registration ensures that your health record is accurate and complete. This allows us to focus more time on your health concerns during your visit.

Consult

Fri ⌚ Starts at 12:45 PM EDT
5 🏥 The Ottawa Hospital Academic Family Health Team - Civic Campus
Apr 👤 With David Davidson
